

**Mouli Narayanan,
Founder & CEO Zeblok Inc**

Mouli is the Founder and CEO of Zeblok Inc. Zeblok provides first-in-class medical grade digital insights and digital biomarker bioinformatics platform for life science and healthcare companies to fill a big void in creation of digital ecosystems. Such digital ecosystems are needed by sponsors and providers to further delivery of personalized care, achieve fuller engagement with patients and physicians, and drive data insights predictive capabilities to improve patient outcome and increase commercial value of drug pipeline. Prior to Zeblok Mouli was Senior Digital Technologist at JPMorgan, specializing in large scale distributed systems. As a chief architect in multiple business lines he has delivered pivotal capabilities including one of the largest grid computing cluster on Wall Street, award winning brokerage workstation technology integrating 100 plus applications and an OMS/EMS trading platform for equities and options. Mouli has an MS Computer Science and Engineering from Penn State.
