Mary Wallace has over 36 years of experience working with Large Enterprise clients to drive new business outcomes through the application of technology and digitization. Most recently, Mary was a Senior Manager of Solutions Architecture at Amazon Web Services responsible for leading enterprise customers in the Northeast Area in their journey to the AWS Cloud. Prior to AWS, Mary spent 35 years at IBM where she was the Director of System Z Client Success for North America and led 300 technical specialists and architects, including the Mainframe CoE and the Washington Systems Center. As a technical professional at IBM, Mary held roles in Systems Development, Systems Engineering, Availability Services, and Enterprise Architecture. As a Technical Leader, Mary led teams that focused on cross platform hardware, Mainframe solutions, and Insurance Industry applications.

Across all roles, Mary has led teams to engage with Enterprise customers to transform business. Technologies such as Cloud Computing and Artificial Intelligence are accelerating the pace of innovation and disrupting the way consumers and producers interact in today's economy. Mary is passionate about helping large organizations transform technically and culturally to thrive in the digital age.

Mary holds a Bachelor of Engineering degree from Steven's Institute of Technology in Mechanical Engineering and has completed select graduate studies in Systems Engineering and Management. Since March of 2021, Mary has been taking a career break and is currently preparing for a volunteer position as Court Appointed Special Advocate in central NJ.
