

Donna Dillenberger, IBM Fellow at IBM's Watson Research Center

Donna Dillenberger is an IBM Fellow at IBM's Watson Research Center. She has worked on machine learning models for financial, insurance, retail, and healthcare industries. She has designed new features for systems scalability and availability. She is a Master Inventor, an Adjunct Professor at Columbia University, the IBM CTO of Systems Research for Hybrid Cloud and has been elected to the Board of Trustees of Marist College. She is currently working on machine learning, counterfeits, Z systems, cloud and the future of learning.
