Evolution of a Career... *Assertions*

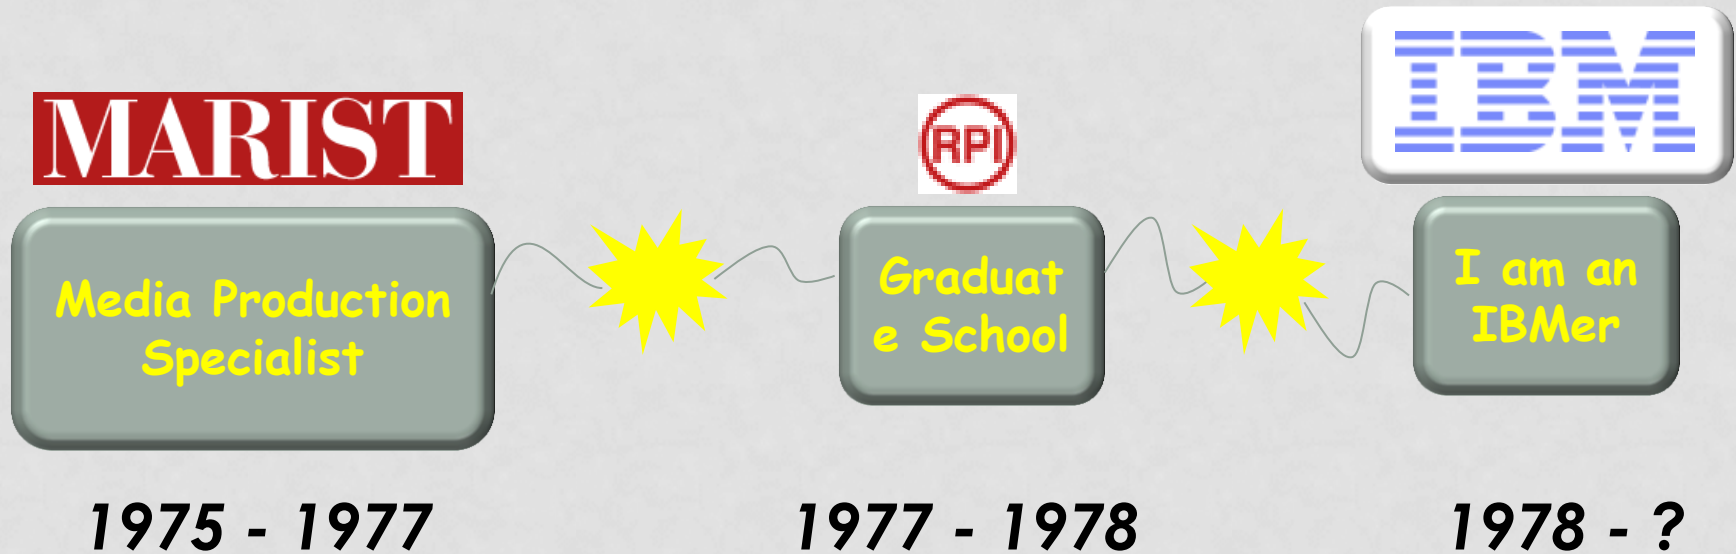

Evolution is a process of continuous change from a lower, simpler state to a higher, more complex, or better state ...

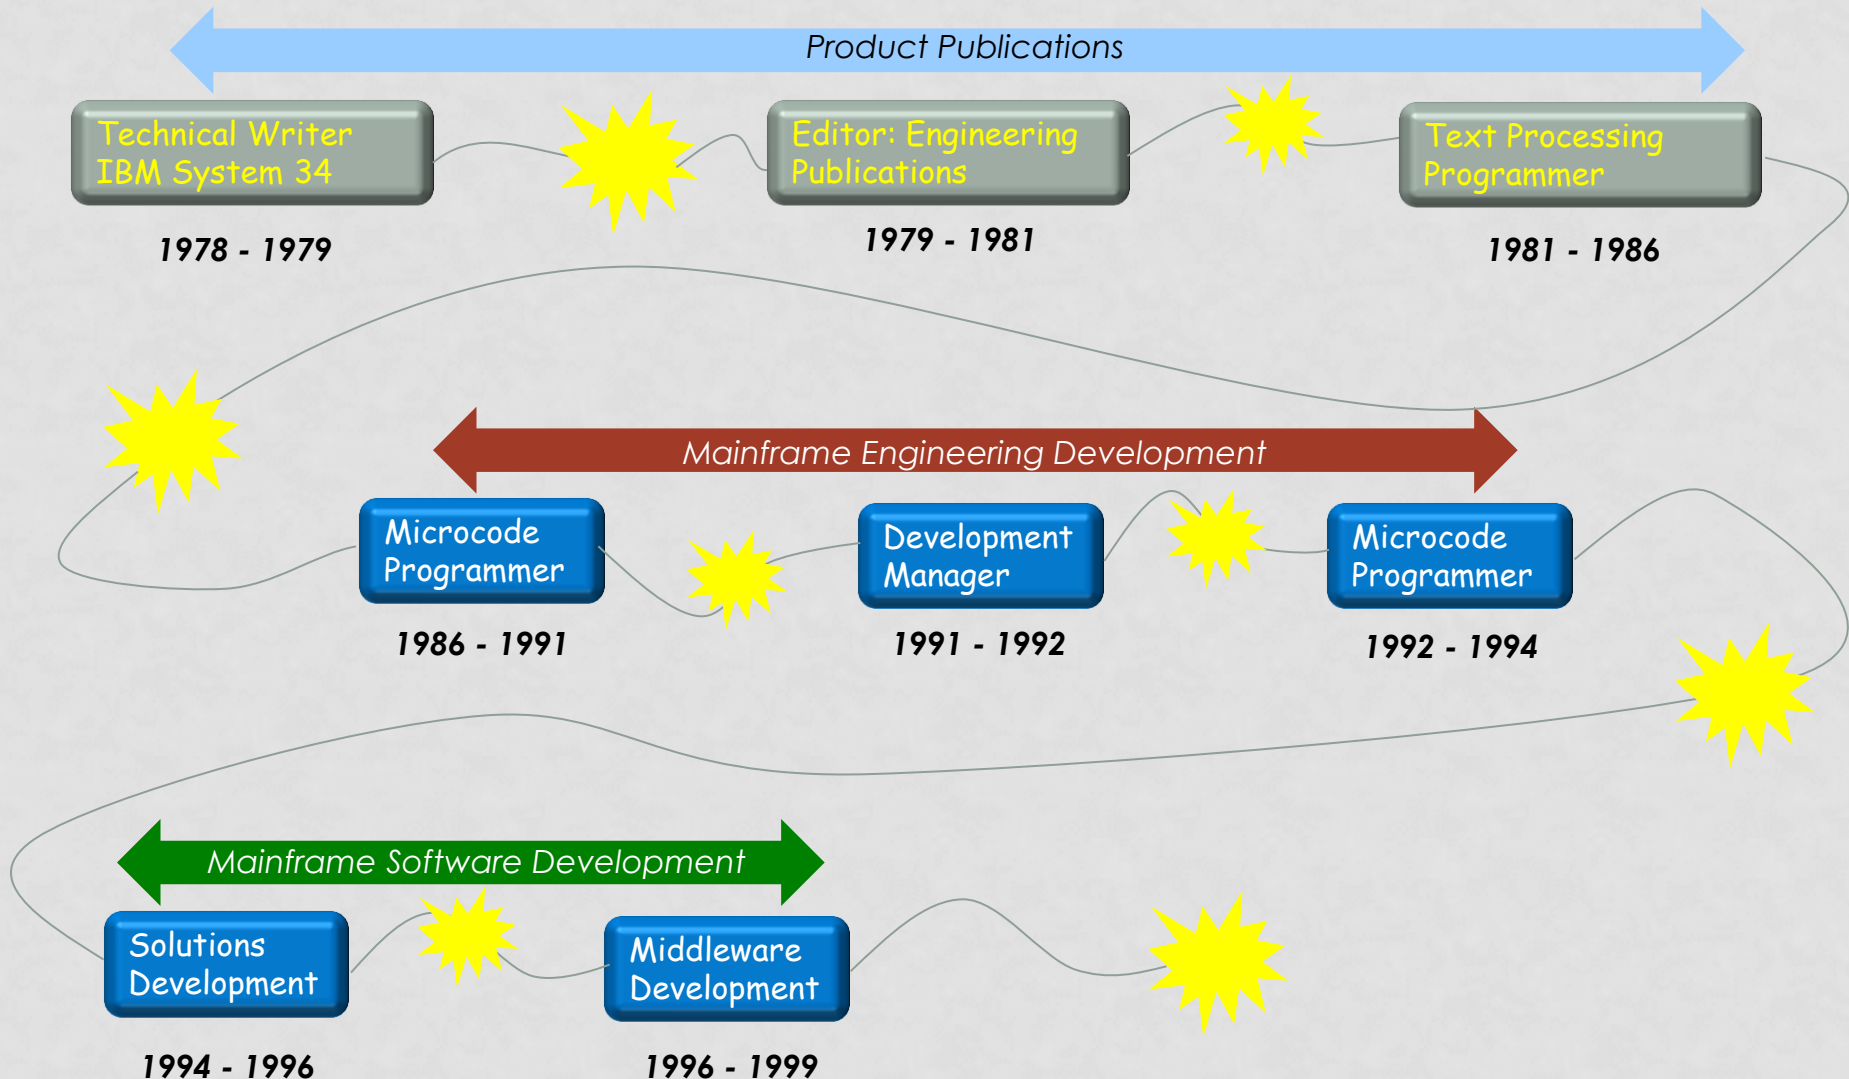

... all careers include a series of critical decision events

The presentation explores how decision events throughout your career in enterprise computing will help you achieve growth and position you for a shot at key leadership roles.

Evolution of a Career... *The Beginnings*

Evolution of a Career... Widening the Scope

Evolution of a Career... *Industry Specialization*
